#### **1 Identification**

- · Product identifier
- · Trade name:
- · Article number: 2897
- · Application of the substance / the mixture Water treatment
- · Details of the supplier of the safety data sheet
- · Manufacturer/Supplier:

· Information department: Product safety department.

· Emergency telephone number:

#### 2 Hazard(s) identification

· Classification of the substance or mixture

GHS08 Health hazard

Repr. 2

H361 Suspected of damaging fertility or the unborn child.

GHS05 Corrosion

Skin Corr. 1B H314 Causes severe skin burns and eye damage.

Eye Dam. 1 H318 Causes serious eye damage.

Acute Tox. 4 H302 Harmful if swallowed.

· Label elements · GHS label elements The product is classified and labeled according to the Globally Harmonized System (GHS). · Hazard pictograms GHS05, GHS07, GHS08 · Signal word Danger · Hazard-determining components of labeling: 2-diethylaminoethanol Cyclohexylamine morpholine · Hazard statements Harmful if swallowed. Causes severe skin burns and eye damage. Suspected of damaging fertility or the unborn child. · Precautionary statements Do not breathe dust. Wear protective gloves/protective clothing/eye protection/face protection. Do not eat, drink or smoke when using this product. Do not handle until all safety precautions have been read and understood. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. IF ON SKIN: Wash with plenty of water.

#### **4 First-aid measures**

- · Description of first aid measures
- · General information: Immediately remove any clothing soiled by the product.
- · After inhalation: Supply fresh air; consult doctor in case of complaints.
- After skin contact: DO NOT DELAY! Immediately rinse with water. If skin irritation continues, consult a doctor.
  After eye contact: DO NOT DELAY! Check for and remove any contact lenses. Rinse opened eye for several minutes under running water. Then consult a doctor.
  After swallowing: DO NOT DELAY! Drink copious amounts of water and provide fresh air. Immediately call a doctor. Do not induce vomiting; immediately call for medical help. If vomiting occurs spontaneously, keep head below hips to prevent aspiration.
  Information for doctor: Treat symptomatically and supportively.
- Most important symptoms and effects, both acute and delayed No further relevant information available.
- · Indication of any immediate medical attention and special treatment needed
- No further relevant information available.

#### **5** Fire-fighting measures

- · Extinguishing media
- · Suitable extinguishing agents:

CO2, extinguishing powder or water spray. Fight larger fires with water spray or alcohol resistant foam. • Special hazards arising from the substance or mixture

During heating or in case of fire poisonous gases are produced.

In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion.

- · Advice for firefighters
- · Protective equipment:

Do not inhale explosion gases or combustion gases. Wear self-contained respiratory protective device.

- Wear fully protective suit.
- $\cdot$  Additional information Cool endangered receptacles with water spray.

#### **6** Accidental release measures

 Personal precautions, protective equipment and emergency procedures Wear protective equipment. Keep unprotected persons away.
 Ensure adequate ventilation Keep ignition sources away - no smoking.
 Environmental precautions: Do not allow to penetrate the ground/soil.

• Methods and material for containment and cleaning up: Pick up mechanically. Send for recovery or disposal in suitable receptacles.

Ensure adequate ventilation.

Reference to other sections
 See Section 7 for information on safe handling.
 See Section 8 for information on personal protection equipment.
 See Section 13 for disposal information.

### 7 Handling and storage

· Handling:

· Precautions for safe handling

Ensure good ventilation/exhaustion at the workplace. Prevent formation of dust.

 $\cdot$  Conditions for safe storage, including any incompatibilities

· Storage:

- **Requirements to be met by storerooms and receptacles:** Prevent any seepage into the ground. Do not store in aluminium, copper, zinc containers.
- Information about storage in one common storage facility: Store away from oxidizing agents.
   Store away from foodstuffs.

• Further information about storage conditions: Keep receptacle tightly sealed. Store in cool, dry conditions in well sealed receptacles. None. Protect from heat and direct sunlight.

 $\cdot$  Specific end use(s) No further relevant information available.

Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation • Material of gloves

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

#### · Penetration time of glove material

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

#### · Eye protection:

Tightly sealed goggles

#### · Body protection:

Impervious protective clothing

Body protection must be chosen depending on product properties, activity and possible exposure.

#### **9** Physical and chemical properties

### **10 Stability and reactivity**

• Reactivity No further relevant information available.

· Chemical stability

Thermal decomposition / conditions to be avoided: No decomposition if used and stored according to specifications. To avoid thermal decomposition do not overheat.
Possibility of hazardous reactions The product is a strong base, it reacts violently with acid and is corrosive. Reacts violently with strong oxidants causing fire hazard. Reaction with nitrosating agents (e.g. nitrites, nitrous acid, nitrous gases) can release cancerogenic nitrosamines.
Conditions to avoid No further relevant information available.
Incompatible materials: Strong acids and oxidising agents

- Substances specifically listed in section 10.3 as incompatible.
- Hazardous decomposition products: Nitrogen oxides (NOx)

Carbon monoxide and carbon dioxide

#### **11 Toxicological information**

- · Information on toxicological effects
- · Acute toxicity:
- Primary irritant effect:
- $\cdot$  on the skin: Caustic effect on skin and mucous membranes.
- on the eye:
- Strong caustic effect.
- Strong irritant with the danger of severe eye injury.
- $\cdot$  Additional toxicological information:

The product shows the following dangers according to internally approved calculation methods for preparations:

Harmful

Corrosive

Irritant

Swallowing will lead to a strong caustic effect on mouth and throat and to the danger of perforation of esophagus and stomach.

ROUTES OF EXPOSURE: The component substances can variously be absorbed into the body by inhalation, through the skin and by ingestion.

EFFECTS OF SHORT-TERM EXPOSURE: The product is corrosive to the eyes, the skin and the respiratory tract. Corrosive on ingestion. May cause effects on the central nervous system.

## **12 Ecological information**

#### · Toxicity

- Aquatic toxicity: No further relevant information available.
- Persistence and degradability The organic portion of the product is biodegradable.
- · Behavior in environmental systems:
- **Bioaccumulative potential** Product is not expected to bioaccumulate.
- Mobility in soil No further relevant information available.
- · Additional ecological information:
- · General notes:

Water hazard class 2 (Self-assessment): hazardous for water

Do not allow product to reach ground water, water course or sewage system. Must not reach bodies of water or drainage ditch undiluted or unneutralized.

Danger to drinking water if even small quantities leak into the ground.

- · Results of PBT and vPvB assessment
- **PBT:** Not applicable.
- **vPvB:** Not applicable.
- $\cdot$  Other adverse effects No further relevant information available.

### **13 Disposal considerations**

- · Waste treatment methods
- · Recommendation:

Recommended Hierarchy of Controls:

- Minimise waste;
- Reuse if not contaminated;
- Recycle, if possible; or
- Safe disposal (if all else fails).

Must not be disposed of together with household garbage. Do not allow product to reach sewage system. Contact waste processors for recycling information.

Used, degraded or contaminated product may be classified as hazardous waste. Anyone classifying hazardous waste and determining its fate must be qualified in accordance with state and international legislation.

#### · Uncleaned packagings:

· Recommendation:

Disposal must be made according to official regulations.

Container remains hazardous when empty. Continue to observe all precuations.

Containers, even those that are "empty," may contain residues that can develop flammable vapours upon heating. Do not cut, drill, grind, weld, or perform similar operations on or near empty containers.

• Recommended cleansing agent: Water, if necessary with cleansing agents.
